# SRC4U - Updater 2.0 Installer
# Installation instructions

When SRC4YOU, LLC makes a new version of its software products available, it will be installed on your computer and or portable products (such as the USB Stick software dongle) through the use of a SRC4U software updater program that was created specifically for this purpose.

Follow these instructions to load the software updater program onto your computer. Plan on loading this updater program onto each and every computer and on each SRC4U Portable version USB Stick/dongle on which you will use SRC4U software programs.

---

The Short-N-Sweet / Quick and Dirty instructions for really savvy computer folks:
1. If you have the SRC4U-Updater installed on your Computer, please uninstall it first.
2. Use this link to get the SRC4U-Updater2.0
http://www.src4all.com/src4u_files/ud2/install-updater2.exe
3. After installation you will have an Icon for the SRC4U-Updater2.0 on your desktop.
Run it, select your installed SRC4U-Version
Select > check for updates <
You will be prompted for continuation if new files are found.
That should do it.

---

Detailed instructions for the rest of us, non-tech computer user types.

I.   Microsoft VISTA and Windows 7 operating systems users are highly recommended to temporarily disable the UAC settings.  ***This step is not required for those using the Windows XP operating systems***.

II.  All users must uninstall any previously installed versions of the SRC4U Software updater program.

III. Install the current version of the SRC4U Software updater program.  This step requires that you have access to an internet connection.

IV.  Update any files as necessary.

V.   Microsoft VISTA and Windows 7 operating systems may restore their UAC settings to the previous settings.  ***This step is not required for those using the Windows XP operating systems.***

**Temporarily disabling UAC on Microsoft VISTA operating system.**
1. Click on the Start button
2. Click on control panel (right hand column)
3. On the upper left hand side of the screen click on "control panel home" (if it is highlighted, you are already there)

4. Click on the heading "user account and family safety"
5. Click on the heading "user accounts"
6. Click on  "Turn user accounts controls on or off"
7. If there is a check mark in the box "Use user Account Control (UAC) to help protect your computer" uncheck it and click ok.  If the box is unchecked your UAC is already off.
8. You must restart your computer for the changes to take affect.
9. After you have completed the instructions for installing the SRC4U Software Updater, on both your computer and Portable Version USB stick/dongle you may repeat these steps to restore your previous UAC settings -- turning your UAC settings back on.

**Temporarily disabling UAC Microsoft Windows 7 operating system.**
1. Click on the Start button
2. In the search box that appears at the bottom of the start menu type in   UAC.
3. At the top of the menu page after typing UAC this should appear "Change user account controls".  Click on that.
4. A window will open that shows a slide bar that says "Always notify" at the top and "Never notify" at the bottom.
5. Slide the bar to the bottom to specify "Never notify"
6. Click OK at the bottom right of the window.  Your UAC settings have now been changed to this new setting.
7. You must restart your computer for the changes to take affect.
8. After you have completed the instructions for installing the SRC4U Software Updater, on both your computer and Portable Version USB stick/dongle you may repeat these steps to restore your previous UAC settings -- turning your UAC settings back on.

**Uninstall any older SRC4U software updater programs previously loaded onto your computer.**
Older SRC4U updater program versions must first be uninstalled before the new SRC4U updater software is loaded.  The process of uninstalling software varies based on the particular operating system that is loaded onto your computer.  Most are accessed through the Control Panel on your computer (Control Panel; Uninstall programs).  If you are unfamiliar with this process, have someone who knows about this process help you with it.

**Uninstall previous SRC4U Software Update programs in Microsoft Windows XP**

1. Click start button
2. Click on control panel

SRC4U - Updater 2.0 Installer
Installation instructions

3. Click on add and remove programs
4. Scroll through the list, find the "src4u updater", left click and then click "Remove"

**Uninstall previous SRC4U Software Update programs in Microsoft Windows VISTA and Windows 7**

1. Click on the Start button
2. Click on Control panel
3. Click on "Classic view"  (upper left hand side of page)
4. Double click on "Programs and features"
5. Scroll through the list and find "SRC4U Updater", left click on it and click on Uninstall (located on grey bar near the top of the page)

**Install the current version of the SRC4U Software updater program.  This step requires that you have access to an internet connection.**

1. Follow this link to access the new SRC4U updater program:  the SRC4U-Updater2.0

http://www.src4all.com/src4u_files/ud2/install-updater2.exe

1. An Opening install-updater2.exe message appears.  Click "Save File".
2. A Downloads message window appears.  Double Click "install-updater2.exe".
